WORK EXPERIENCE

zeb | Software Engineer | AI Platform Engineering **Chennai, TN | Feb 2026 - Present**

- Designed and developed agentic AI systems and integrated with enterprise data platforms using MCP tools enabling seamless user interaction through chatbot-driven workflows to automate complex data engineering and data quality operations.
- Built Data Integration Replication Pipeline Creation Agent, enabling users to dynamically discover compatible source–target data source connections via a conversational chatbot and automatically create end-to-end data replication pipelines.
- Implemented MCP tools to orchestrate connection validation, pipeline configuration, and execution by eliminating manual setup.
- Developed Data Quality Rules Creation Agent leveraging MCP tools and existing DQ APIs to allow users to create, validate, and manage data quality rules through a chat interface, reducing manual rule-building effort by 90%.

Avasoft | Software Engineer | AI/ML Team **Chennai, TN | Dec 2023 – Jan 2026**

- Has hands-on experience fine-tuning large language models by preparing datasets and training the model for domain specific performance**,** resulting in an 85% improvement in relevant model responses.
- Deployed the fine-tuned model on AWS using Sagemaker inference endpoints, leveraging Sagemaker Studio and Notebook Instances leading to a significant boost in customer satisfaction.
- Delivered full-stack AI solutions using Fast API and PostgreSQL, incorporating advanced techniques like Retrieval-Augmented Generation (RAG) and prompt engineering.
- Proficient in AWS cloud services, including Bedrock, SageMaker, S3, Textract, Lambda, and others to build scalable and reliable AI applications
- Successfully handled the full Software engineering project lifecycle from requirement gathering and sprint planning to delivery and closure ensuring 100% on-time delivery.
- Skilled in documenting technical processes and training peer software engineers.

SKILL SUMMARY

- **Programming Languages:** Python, JavaScript, Go & SQL.
- **Tools, Libs & Frameworks:** UML, React.js, Tailwind CSS, Git, Jupyter Notebook, Fast MCP & Fast API.
- **Databases:** PostgreSQL & AWS DynamoDB.
- **Cloud platform:** Amazon Web Services.
- **Languages:** Fluent in English & Tamil (speaking, reading, and writing).

PROJECTS

- **Data Integration Replication Pipeline Creation Agent:** Developed an agentic, MCP-driven data integration system using Pydantic AI to enable chatbot based selection of source–target connections and automate end-to-end data replication pipelines, including combination validation, schema mapping, and pipeline creation, significantly reducing manual setup effort.
- **Data Quality Rules Creation Agent:** Developed an MCP-driven rule automation agent using Pydantic AI integrating Data Integrity Suite APIs with vector search using AWS S3 Vectors, enabling chat-driven rule creation and validation with reducing manual rule-building effort by 90% while improving operational efficiency.
- **Empathetic Model fine-tuning:** Fine-tuned and deployed LLaMA 3.2 3B model using an empathetic, culturally competent dataset within AWS SageMaker Studio, Notebook Instances, and S3 bucket resulting in an 85% improvement in response relevance and customer satisfaction.
- **AI-Powered Credit Report Processor:** Developed an intelligent document processing system that allows users to upload credit reports from any provider for mortgage processing. Utilized AWS Bedrock services to extract key data such as credit score, liabilities, and banking details, enabling auto-prefill of mortgage application forms and eliminating manual data entry.

EDUCATION

St. Joseph's College of Engineering **Chennai, TN | 2019 - 2023**

- Bachelor of Engineering in Electrical & Electronics; **CGPA: 8.15**
