PROFESSIONAL SUMMARY

- AI-focused software engineer with **2.5+ years of experience** building production-grade AI applications, Agentic AI systems, and LLM-powered solutions on AWS.
- Known for taking a manual process and automating the repeatable 80% of it with AI, while keeping a human in the loop for the part that needs judgment.
- Passionate about designing scalable, cloud-native AI systems that solve complex business problems.

PROFESSIONAL EXPERIENCE

zeb AI | Chennai, TN

Feb 2026 - Present

Software Engineer, AI Platform Engineering

- Designed and developed production-grade Agentic AI systems integrated with enterprise data platforms using Model Context Protocol (MCP), enabling chatbot-driven automation for complex data engineering and data quality workflows.
- Developed an AI-powered Data Integration Pipeline Creation Agent that allows users to discover compatible source-to-target data connections through natural language conversations.
- Automated end-to-end data replication pipeline generation, including connection validation, schema mapping, pipeline configuration, and execution using MCP tools, significantly reducing manual setup effort.
- Built a Data Quality Rules Creation Agent integrating MCP tools with enterprise Data Quality APIs, enabling users to create, validate, and manage data quality rules through a natural language interface while reducing manual rule-building effort by 90%.
- Developed an automated code review service using Anthropic's Claude Agent SDK and AWS Bedrock, integrating the solution into the DevSecOps pipeline to eliminate manual lead reviews and reduce code review turnaround time by up to 70%.
- Built and deployed multiple enterprise-grade internal operations platforms Databricks applications for a leading logistics company, including employee management and internal operations platforms, enhancing operational efficiency while strengthening customer relationships and trust through scalable, cloud-native AI solutions.

Avasoft | Chennai, TN

Dec 2023 - Jan 2026

Software Engineer, AI/ML Team

- Fine-tuned large language models by preparing domain-specific datasets and optimizing model performance, improving response relevance by 85%.
- Deployed fine-tuned LLMs on AWS SageMaker Inference Endpoints using SageMaker Studio and Notebook Instances, significantly improving model accessibility and customer satisfaction.
- Developed enterprise-grade AI applications using FastAPI, PostgreSQL, Retrieval-Augmented Generation (RAG), and prompt engineering techniques to deliver scalable AI solutions.
- Built scalable AI applications using AWS services including Bedrock, SageMaker, Lambda, S3, Textract, and DynamoDB.
- Managed the complete software development lifecycle from requirement gathering and sprint planning through implementation, deployment, and production delivery while maintaining 100% on-time project completion.
- Skilled in documenting technical processes and mentored peer software engineers by sharing implementation knowledge, development best practices, and AI engineering workflows.

Concreate | Chennai, TN

Sep 2023 - Sep 2023

Web Developer, Internship

- Built client websites end-to-end, turning requirements and brand guidelines into responsive, functional front-end builds.

CORE SKILLS

- **Languages:** Python | JavaScript | SQL
- **Frameworks & Libraries:** FastAPI | FastMCP | React.js | LangChain | LangGraph
- **Databases:** PostgreSQL/LakebaseSQL | pgvector | Amazon DynamoDB
- **Data & AI Platforms:** Databricks (Apps, Lakebase, Genie, Jobs)
- **Developer Tools:** Claude Code | OpenAI Codex | Kiro
- **Cloud:** AWS

PROJECTS

- **Automated Claude Code Review Service:** Developed a code review service using Claude Agent SDK with AWS Bedrock, retrieving internal organization-specific skill documents from S3 based on the project's tech stack to evaluate solution design and code quality. Improved code review accuracy by 95% and reduced review turnaround time by 70% by integrating the service as a dedicated stage in the DevSecOps pipeline.
- **Data Integration - Replication Pipeline Agent:** Orchestrated an agentic, MCP-driven data integration system using Pydantic AI to enable NLP based selection of source–target connections and automate end-to-end data replication pipelines, including combination validation, schema mapping, and pipeline creation, significantly reducing manual setup effort.
- **Data Quality - Rules Creation Agent:** Built an MCP-driven rule automation agent using Pydantic AI integrating Data Integrity Suite APIs with semantic search using AWS S3 Vectors, enabling NLP-driven rule creation and validation with reducing manual rule-building effort by 90% while improving operational efficiency.
- **Enterprise Databricks Applications:** Designed and deployed 3 enterprise applications on Databricks using React, FastAPI, Lakebase, and Azure AD for a leading global logistics company. Delivered employee management and operations dashboard solutions that centralized business workflows, eliminated spreadsheet-based processes, and improved data consistency across HR, Finance, and Operations teams.
- **AI-Powered Credit Report Processor:** Implemented an Intelligent document processing system that allows users to upload credit reports from any provider for mortgage processing. Utilized AWS Bedrock services to extract key data such as credit score, liabilities, and banking details, enabling auto-prefill of mortgage application forms and eliminating manual data entry.
- **Empathetic Model Fine-Tuning:** Fine-tuned and deployed LLaMA 3.2 3B model using an empathetic, culturally competent dataset within AWS SageMaker Studio, Notebook Instances, and S3 bucket resulting in an 85% improvement in response relevance and customer satisfaction.

EDUCATION

St. Joseph's College of Engineering | Chennai, TN
Bachelor of Engineering in Electrical & Electronics - **CGPA: 8.15**

2019 - 2023
